

1. DESCRIPTION

Product	OKM TRANSFER PAPER
Reference	PT

OKM TRANSFER PAPER is used to decorate orthoses.

Formats available:

PT	Width 1600mm
PT	Width 800mm

2. APPLICATIONS

OKM TRANSFER PAPER is a decorative paper whose designs can be transferred using heat and pressure to different types of materials such as polyethylene, polypropylene, and fabrics and microfibres with a minimum polyester content of 70%.

3. CONDITIONS OF USE

OKM TRANSFER PAPER is mainly used for decorating thermoplastic and textile orthoses (minimum 70% polyester). We recommend applying the paper to the top of the material (at a temperature of approximately 180°C), applying pressure, and then removing the paper and using the plastic. To enhance ease of extraction, we recommend using KA94 silicone lubricant spray or KA93 non-silicone lubricant spray on the material before applying the paper.

4. TECHNICAL SPECIFICATIONS

TECHNICAL SPECIFICATIONS	UNIT	VALUE
Weight (ISO 536)	g / m ²	50
Thickness (ISO 534)	µm	70 ±3

Textile materials and inks for sublimation paper comply with Oeko-Tex Standard 100: a uniform global system for testing and certifying that textile materials, and intermediate and end products, do not contain agents that are toxic or hazardous to health.

5. STORAGE CONDITIONS

No specific storage conditions are required. We recommend storing at room temperature and in non-humid environments.
